- 2. OPEN**
Open your web browser and type [airborne.gogoinflight.com](#)
- 3. SELECT**
Select Free Messaging pass
- 4. BEGIN**
Begin messaging

Free Messaging varies by aircraft and route. In some cases, Wi-Fi may not be available outside the continental U.S. for domestic aircraft traveling internationally. Please check the Wi-Fi coverage area map on your particular aircraft for details. Use of the Gogo[®] Inflight Internet service is subject to terms of use, available at [gogoair.com](#). Voice service is not permitted nor supported. In-flight connectivity works with virtually any Wi-Fi-enabled device that runs Android[®], Apple[®], Windows[®] and Blackberry[®] platforms. Supported browsers include Safari, Google Chrome, Windows Explorer (version 8 or above), and Firefox. The service works just like most wireless mobile broadband services on the ground. Any liability for damage to the passenger caused by loss of information or data is rejected by the airline. In case of misuse or manipulation, any liability is rejected by the airline. Even within the nationwide coverage area, there are several factors that may interfere with actual service, quality and availability, including the ability to initiate, validate and maintain an in-flight connection. These factors include, but are not limited to, network changes, aircraft and network traffic volume, service outages, technical limitations, signal strength, and other conditions.
